

COMMUNOPOLY

3 to 6 players

CONTENTS:

Gameboard, 2 dice, 9 tokens, 32 flats, 12 blocks, 16 No Chance cards, 16 Communist Test cards, 12 Comrade cards, 26 State Property cards, 6 Party Membership cards, 12 Radiation tokens, money.

OBJECT:

Score the most points by purchasing and selling State property, taking money from the State, acquiring Personal Property, and achieve endgame conditions before the last Comrade card is drawn, marking the fall of the Soviet Union.

SETUP:

1. Place the board on a table. Shuffle and place the No Chance and Communist Test cards on their designated spaces.
2. Each player selects a token to represent them on the board, placing the tokens on STOY!
3. Designate a player as the State, responsible for managing the State's finances, property, and auctions.
4. Distribute ₽1000 to each player as follows: 1 ₽500, 3 ₽100, 2 ₽50, 3 ₽20, 2 ₽10, 3 ₽5, 5 ₽1. The remaining money and equipment belong to the State.
5. Take 5 Comrade cards and add an additional card per player to create the Comrade card deck. Deal one Comrade card to each player, keeping them face-up.
6. Each player rolls the dice. The player with the lowest roll begins.

THE STATE:

The State manages State Property cards, flats and blocks before players purchase them. It handles bonuses, fees, payments, and auctions, as well as the consequences of No Chance and Communist Test cards.

THE PLAY:

1. On your turn, roll the dice and move your token in the direction of the arrow for the indicated number of spaces.
2. After your turn, play proceeds clockwise. Multiple tokens can occupy the same space simultaneously.
3. Depending on the space your token lands on, you may be able to acquire State Property, have to pay State Fees, or draw a card.
4. If your cash exceed ₽1000 or drop below ₽0 at any time, you are sent straight to the GULAG!

DOUBLES:

1. Rolling doubles allows you to move your token, apply the space's effect, then roll again.
2. Rolling doubles thrice in succession sends you to the GULAG!

STOY!:

Landing on STOY! rewards you with ₽200. If you pass over STOY! you must bribe the checkpoint guard ₽50 to continue.

THE GULAG:

You can get sent to the Gulag in various ways:

1. Having more than ₽1000 or less than ₽0 of cash at any time.
2. Rolling **doubles three times** in a row on a turn.
3. A player landing on a space you are **smuggling** money under.
4. Allowing **Chernobyl Power** to explode under your watch.
5. Landing on the **Gulag space** and trespassing.
6. Getting sent there from the **NKVD Headquarters**.
7. The effects of a **No Chance** or **Communist Test** card.

When you are sent to the Gulag, move your piece to the **GULAG** space and immediately end your turn.

At the start of every turn you spend in the Gulag, you must **pay ₽100** to the State per turn in protection money. If you cannot pay the State because of insufficient funds, you immediately **DISAPPEAR!**

Escape the Gulag by rolling a one on either or both dice, using a **DON'T LOOK BACK** or **DENOUNCE YOUR COLLABORATORS** card. These cards may be purchased off of other players while in the Gulag.

Rolling doubles in the Gulag (excluding double ones which release you) immediately causes you to **DISAPPEAR!**

THE POST OFFICE:

When landing on the Post Office space, you may smuggle money to the West by placing any amount of your cash under the space. When you next land on or pass over the Post Office, the money is smuggled and is put aside for you until the end of the game.

Smuggled money is not given back to the State when you disappear, however, if you disappear and have money that hasn't yet been smuggled under the Post Office, that money is given back to the State.

If a player lands on the Post Office when it has your money under it, they get to keep the money under the space, and you **DISAPPEAR!**

THE KREMLIN:

When you land on the Kremlin space and you already have a party membership card, resolve the membership's ability.

When you land on the Kremlin and don't have a party membership card and the maximum party members at a time hasn't been reached, go through the party membership card pile, and choose one to take and place it in front of you.

When you land on the Kremlin space and you don't have a party membership, but the maximum party members have been reached, you must take a party membership card from another player. When your membership is revoked when you disappear, place it back in the party membership pile.

In a 3 or 4 player game, there can be a maximum of 2 party members at a time. In a 5 to 6 player game, there can be a maximum of 3 party members at a time.

THE NKVD HEADQUARTERS:

When you land on the NKVD Headquarters, you must immediately roll a die. If you roll a 1 or 2, stay on the space and suffer no other effects. If you roll a 3 to 6, immediately move your piece to the **GULAG** space. You do not pay the checkpoint guard for passing STOY!

PEOPLE'S COMMISSARIAT FOR FINANCE:

When you land on the the People's Commissariat for Finance, you must immediately pay ₽25 to the State per State Property card you have. Utilities are not counted for this purpose, but railway stations are.

PERSONAL PROPERTY CARDS:

Personal Property cards are located in the No Chance deck. When you draw a Personal Property card, place it in front of you with your other assets. Personal Property can be traded like money and properties and can even be used as State Fee payments if the player agrees (to players, the State only takes cash). Personal Property cannot be lost to disappearing and always carry over to the next Comrade card. Personal Property can never be used for a payment to the State. Personal Property cards are worth the number of points listed on the card at the end of the game.

TRADING BETWEEN PLAYERS:

Players may trade money, State Property, Personal Property, and No Chance or Communist Test cards that state they can be kept until need. Players cannot lend money for nothing in return.

FLATS AND BLOCKS:

When you own all the properties in a colour group, you may buy flats from the State and place them on these properties. You may only buy houses on your turn.

When dealing with State fees on properties with no buildings, the fees are paid to the State itself. Once there is at least one building on the property, State fees go to the owner of the property.

Buildings cannot be sold once bought. If the property is sold or seized, the buildings stay on the property and can be used by the next owner.

Once you have built two flats on a property, you next build a block, replacing the flats on it. Only one block may be built per property.

RADIATION:

If you land on a property with a Radiation marker, you must pay 50 to the State in medical fees. Radiation markers can only be removed by acquiring Volga Water from the State, allowing you to remove one Radiation marker from any property at the moment you acquire it OR by using the power of the Minister of Health. Once a property has a Radiation marker, only properties without a Radiation marker are considered part of the set for endgame and building purchasing reasons.

SELLING PROPERTY:

Properties and railway stations may be sold to any player for any amount the owner can get, or back to the State for the amount on the State Property card. When a property is sold back to the State, the State Property card is returned to the State and the State pays out the money stated. Buildings are sold with the property and do not increase the sell price and also can't be removed or sold when selling the property itself. Utilities cannot be sold back to the State.

DISAPPEARING:

You can disappear in various ways:

1. Rolling **doubles** (except double ones) in the Gulag.
2. Owing **more** than you can **pay** to another player or to the State.
3. An effect from a **No Chance** or **Communist Test** card.

When you DISAPPEAR:

1. Discard you current Comrade card.
2. Return your party membership card to the party membership pile.
3. All remaining properties and cash you have return to the State. However, you keep any Personal Property cards, No Chance and Communist Test cards that allow you to keep them, and successfully smuggled money you have.
4. Any money that hasn't been smuggled and is still under the board is returned to the State.
5. Draw a new Comrade card and take ₽1000 from the State.
6. Move your piece back to STOY! Play a turn as this new Comrade.

If you draw the last Comrade card, the endgame begins. Immediately take a turn as your new comrade as usual as your new Comrade as per usual. Every player gets one more turn from now and once you take your final turn, the game ends.

GAME END:

The remaining population scrambles for wealth as the Soviet Union falls. The winner of the game is whoever has the most points which come from a few main sources:

1. Total up your **money in the West** and score **10 POINTS** for every ₽100 you smuggled.
2. Add your points from your **Personal Property** cards.
3. Add any points you gain from your current **Comrade card**.
    a. If you happened to disappear in the last round, resulting in you needing to draw a Comrade card when there are none left, you discard your current Comrade card and score no points from a Comrade card.
